PRODUCT COMPARISON · UPDATED NOVEMBER 2026

Dollar Universe vs Automic®

Know your options.

Dollar Universe has run your batch for years. Now the roadmap calls for AI, cloud, and SaaS, and the know-how often sits with one or two people. Here's how it compares with Automic, Broadcom's market-leading automation platform.

WHAT DOLLAR UNIVERSE TEAMS COMPARE	Dollar Universe	Automic® Automation
Who owns it	Broadcom, since its 2018 acquisition of CA Technologies.	Broadcom's market-leading automation platform, backed by $10.98 billion in R&D (fiscal 2025).
Where it runs	Self-hosted on your own servers: a distributed, peer-to-peer network with one point of control.	Self-hosted in your data center or private cloud, on Kubernetes, or as Broadcom-managed Automic SaaS (U.S. hosting, 99.95% uptime). 1-to-1 feature parity either way.
Job design	Uprocs chained into sessions and launched by tasks on management units (MUs).	Object-oriented framework: object variables let one job definition serve many flows, so you can maintain fewer jobs.
SAP and integrations	Managers for SAP, Oracle, PeopleSoft, JD Edwards, SQL Server, z/OS, and more.	SAP-certified for RISE with SAP S/4HANA, plus 300+ integrations and native Python jobs in Automic v26.

Dollar Universe details from Broadcom's product brief and knowledge base (accessed October 21, 2026). R&D from Broadcom's fiscal 2025 Form 10-K. Automic details, including "market-leading" and "1-to-1 feature parity," from Broadcom's Automic SaaS product page and May 8, 2024 press release.

THREE PATHS FROM DOLLAR UNIVERSE

01 Stay on Dollar Universe

If it does what you need, keep using it. Nothing to convert.

02 Automic self-hosted

Same vendor, in your data center, private cloud, or on Kubernetes.

03 Automic SaaS

Broadcom runs the platform and the upgrades. The cloud on your timeline.

AUTOMIC, FEATURE BY FEATURE

What Dollar Universe teams ask about, *built in*

Everything below comes with Automic® Automation, whether you run it self-hosted or as Automic SaaS.

✓ Self-hosted or SaaS

Same product either way, with 1-to-1 feature parity.

✓ 99.95% uptime on SaaS

Broadcom-managed Automic SaaS with U.S. hosting.

✓ Zero-downtime upgrades

Upgrade self-hosted Automic without stopping your schedule.

✓ Kubernetes

Deploy and manage Automic in cloud containers.

✓ Object reusability

Object variables let one job definition serve many flows.

✓ Jobs as code

Define, version, and deploy automation like software.

✓ 300+ integrations

Plus native Python job execution in Automic v26.

✓ SAP-certified integration

Certified for RISE with SAP S/4HANA, with integrations for BTP and BusinessObjects.

✓ Predictive SLA management

AAI flags deadline misses before they happen.

✓ Role and object-based security

Control who can see, change, and run each object.

✓ Built to scale

Up to 100,000 agents and 100 million jobs per instance.

✓ Runs on any host

Windows, Linux, Unix, Azure, AWS, and Google Cloud.

✓ Self-service for app teams

Application owners check their own jobs and reports.

✓ AI in Automic v26

An AI Assistant in the web interface, plus AI jobs.

Automic details from Broadcom's Automic Automation, Automic SaaS, and Automation Analytics & Intelligence product materials. Scale figures are Broadcom's per-instance maximums.

Broadcom is a Leader in the 2026 Gartner® Magic Quadrant™ for Service Orchestration and Automation Platforms, evaluated on Automic Automation.

WHY DOLLAR UNIVERSE TEAMS CHOOSE AUTOMIC

Same jobs. *More room to grow.*

Off the upgrade treadmill

On Automic SaaS, Broadcom runs the platform and handles upgrades and upkeep, with U.S. hosting and 99.95% uptime. Unlike some other vendors' SaaS, it has 1-to-1 feature parity with self-hosted Automic, so you give up nothing by moving.

AI and 300+ integrations, built in

Automic v26 adds an AI Assistant and AI jobs, plus native Python, Kubernetes deployment, and jobs as code, with 300+ integrations from SAP to the cloud.

Same vendor. Same jobs. Fewer to maintain.

Dollar Universe and Automic are both Broadcom products, and a conversion keeps your programs and scripts as they are, and carries your schedules over. Automic's object variables let one job definition serve many flows, so many teams end up maintaining fewer jobs.

BROADCOM PARTNER AWARDS 2025

Above and Beyond, Global
