

# FLAWLESS UPGRADES

You Have Legitimate Worries about Business-Critical Automation

## DON'T WAIT 'TIL THE LAST MINUTE

Outdated automation trips up applications like SAP, Oracle, PeopleSoft, BusinessObjects, Hadoop, and Airflow. An upgrade is essential –without bringing down the entire system.

## UPGRADE AUTOSYS WORKLOAD AUTOMATION

### Feasibility Discussion

► What keeps you up at night? We'll get clear on the scope and compatibilities of your existing systems and workflows.

### Co-Created Improvement Roadmap

► We'll provide you with valuable information about underlying issues to be aware of during an upgrade.

### 2-Month Engagement (est.)

► We'll assist with the flawless integration and deployment of an upgraded solution, ensuring minimal disruption to operations.

# You're Not Alone

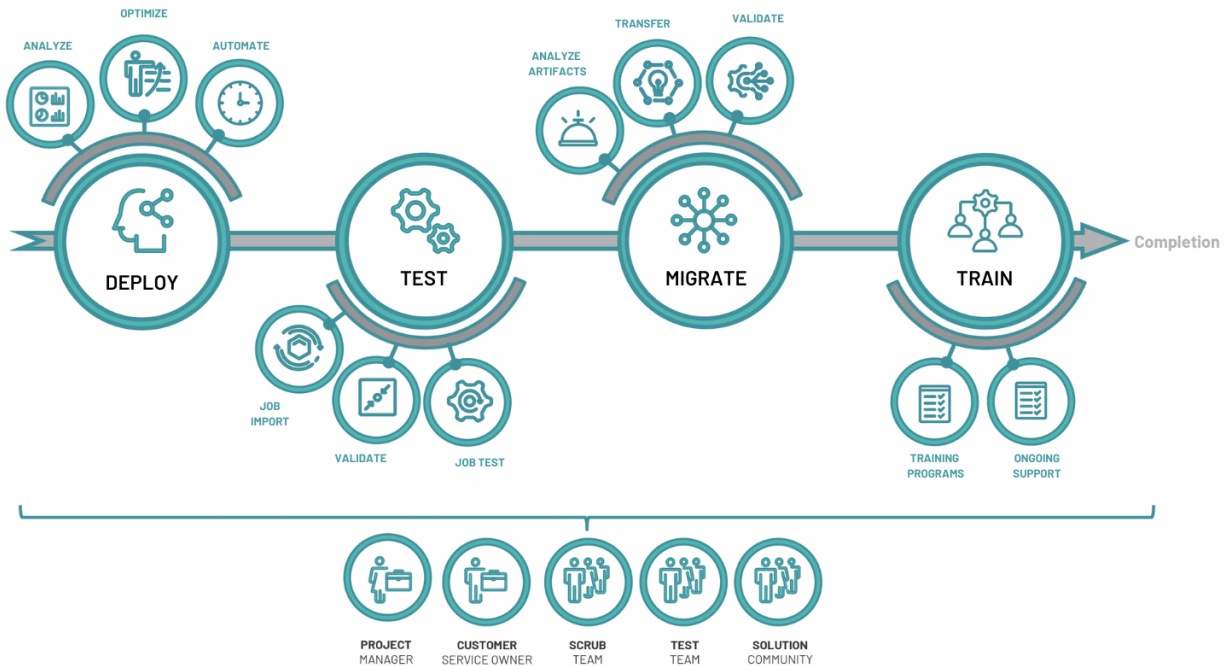

Upgrades only happen every few years, and most teams don't know all the ways to **reduce risk and ensure compatibility** with existing systems and workflows. Limited resources and/or expertise are common.

Reduce Operational Risk

Optimize AutoSys Workload Automation

Deploy New Feature Functionality

## RMT's PROPRIETARY LOW-RISK METHODOLOGY

RMT is Broadcom's Automation Partner of the Year and has performed hundreds of upgrades. ◀
