

# Managed Services

## Run and Operate **AutoSys®** Workload Automation at Scale

Interdependent workloads make a powerful impact on business critical applications and SLAs across your enterprise. That's why even an industry-leading solution like AutoSys requires **expert management** to maximize **availability, compliance, and performance**.

We've provided services to the Fortune 100 for 25 years,  
and we can help you:

- ▶ **Manage, enhance, and maintain** AutoSys Workload Automation
- ▶ **Reduce the cost and complexity of** receiving the support you need
- ▶ **Scale business and IT processes seamlessly**, without disrupting business critical operations
- ▶ **Access WLA experts and resources** you don't have in-house
- ▶ Free up your internal team to work on **high-value work** that translates into business growth
- ▶ Secure a dedicated support team you can rely on and whose **names you know**

# AutoSys Services

Receive end-to-end Workload Automation, administration, incident management, consulting, and enhancements – so you can maximize your ROI and ramp up quickly.

## ADMINISTRATION

Secure continuous monitoring, optimization (patches and upgrades), and management of AutoSys.

## SCHEDULING

Leverage industry-leading best practices and standardization to support your application teams.

## MONITORING

Control front line support for your workflows with daily batch monitoring and responsive issue resolution.

► How can we reduce your costs?

Easily.

Automation is all we do, and we do it well. Small environments don't need a full-time resource. We'll estimate your needs based on your size. As the only player with **onshore and offshore capabilities**, we can offer end-to-end Workload Automation **Services** in line with your budget.
