

EXECUTIVE BRIEF · ORACLE FUSION CLOUD ERP

Close faster. *Prove every step.*

Most month-end closes don't slow down because of Oracle. They slow down in the handoffs between steps.

Automatic, Broadcom's automation platform, runs those handoffs for you across Oracle Fusion, EPM and Oracle Integration Cloud, while Oracle stays your system of record.

Up to 70%

less financial reporting time

Substantial

reduction in manual effort across the close

Up to 80%

less effort to scale to new entities

Results as presented by Broadcom and RMT for the October 15 webinar.

SOUND FAMILIAR?

- Someone on your team watches ESS jobs finish so they can start the next one.
- Files wait in a folder until a person loads them into Fusion.
- Reports are ready when the jobs are done, but nobody knows the jobs are done.
- When a job fails overnight, you hear about it from the business, not the system.

BUILT FOR THE AUDIT: AUTOMIC HELPS WITH

- Full audit traceability: who did what, and when
- Reusable process templates for new entities
- Role-based access controls
- Oracle stays your system of record
- Automated exception handling, with the Oracle diagnostic report attached

Six handoffs, *one schedule*

Broadcom's Oracle Fusion specialists mapped where Automic does the work in a Fusion shop. Here is what each one means for the business.

01 Batch schedules that run themselves

Core batch schedules run end to end, parent and child job sets included, without anyone tracking them across separate consoles.

ENTERPRISE SCHEDULER SERVICE (ESS) · JOB SETS

02 Files in, journals moving

Inbound files are staged and loaded automatically, so General Ledger journals and supplier invoices start processing without a manual handoff.

UNIVERSAL CONTENT MANAGEMENT (UCM) · DATA LOADS

03 Data out, verified

Extracts reach your data warehouse with file integrity checked, so downstream pipelines start only when Fusion processing is complete.

BI CLOUD CONNECTOR (BICC) · MD5 VERIFICATION

04 Payroll and HR in step

Payroll and workforce data loads run on the same schedule as finance, extending orchestration beyond the General Ledger.

HUMAN CAPITAL MANAGEMENT (HCM) · FLOW ACTIONS

05 Reports on time, every time

Reconciliation reports are scheduled, retrieved and delivered to finance leads as soon as the jobs behind them finish.

FINANCIAL REPORTING · OTBI

06 One schedule across Oracle Cloud

Finished Fusion tasks hand off to Oracle EPM for planning and to Oracle Integration Cloud, under one schedule across cloud environments.

EPM · ORACLE INTEGRATION CLOUD (OCI AGENT)

Book a free 30-minute *close workflow review*

Free | 30 minutes | No commitment required

Bring one close workflow with painful handoffs. We'll map the steps and show where Automic returns time. Scan the code or visit robertmarktech.com/oracle-fusion.
