

Tidal vs Automic® Automation

Know your options.

Tidal may be your short-term plan. The question is what comes next. Here is how Tidal and Automic compare on what Tidal teams ask about first: who stands behind the product, where it runs, and how much work it takes to keep running.

WHAT TIDAL TEAMS COMPARE	Tidal	Automic® Automation
Who owns it	Redwood Software, since January 2023. Redwood also sells RunMyJobs.	Broadcom, which invested \$10.98 billion in R&D in fiscal 2025.
Where it runs	On-premises, in the cloud or hybrid.	Self-hosted in your data center or private cloud, on Kubernetes, or as Broadcom-managed Automic SaaS (U.S. hosting, 99.95% uptime). Same features either way.
Job design	Jobs organized in job groups, with variables inherited down nested groups.	Object-oriented framework: object variables let one job definition serve many flows, so you can maintain fewer jobs.
SAP	SAP integrations, including BusinessObjects, Process Integration, IBP and Financial Closing Cockpit.	SAP-certified for RISE with SAP S/4HANA, with dedicated integrations for SAP BTP, Integration Suite, BusinessObjects, Data Intelligence and IBP.
Prebuilt integrations	Prebuilt integrations listed on tidalsoftware.com.	300+ integrations, plus native Python job execution in Automic v26.

Tidal details from tidalsoftware.com (accessed October 13, 2026) and Redwood Software’s January 5, 2023 acquisition announcement; job-group behavior from RMT conversion projects. Broadcom R&D from Broadcom’s fiscal 2025 Form 10-K (company-wide). Automic details from Broadcom’s Automic Automation and Automic SaaS product materials.

THREE PATHS FROM TIDAL

01 Stay on Tidal

You run it yourself, on-prem or in your own cloud. Nothing to convert.

02 Move to RunMyJobs

Redwood’s SaaS platform. If you go that way, you’re going to SaaS.

03 Move to Automic

Broadcom’s Automic, self-hosted or SaaS. The cloud on your timeline.

What Tidal teams ask about, *built in*

Everything below comes with Automic® Automation, whether you run it self-hosted or as Automic SaaS.

Self-hosted or SaaS

Same product either way, with 100% feature parity.

99.95% uptime on SaaS

Broadcom-managed Automic SaaS with U.S. hosting.

Zero-downtime upgrades

Upgrade self-hosted Automic without stopping your schedule.

Kubernetes

Deploy and manage Automic in cloud containers.

Object reusability

Object variables let one job definition serve many flows.

Jobs as code

Define, version and deploy automation like software.

300+ integrations

Plus native Python job execution in Automic v26.

SAP-certified integration

Certified for RISE with SAP S/4HANA, with integrations for BTP and BusinessObjects.

Predictive SLA management

AAI flags deadline misses before they happen.

Role and object-based security

Control who can see, change and run each object.

Built to scale

Up to 100,000 agents and 100 million jobs per instance.

Runs on any host

Windows, Linux, Unix, Azure, AWS and Google Cloud.

Self-service for app teams

Application owners check their own jobs and reports.

AI in Automic v26

An AI Assistant in the web interface, plus AI jobs.

Automic details from Broadcom's Automic Automation, Automic SaaS and Automation Analytics & Intelligence product materials. Scale figures are Broadcom's per-instance maximums.

Broadcom is a Leader in the 2026 Gartner® Magic Quadrant™ for Service Orchestration and Automation Platforms, evaluated on Automic Automation.

Gartner, Magic Quadrant for Service Orchestration and Automation Platforms, Hassan Ennaciri, Daniel Betts, Chris Saunderson, 5 August 2026. Same jobs. *A better engine.*

Self-hosted or SaaS. Your timing.

Automic self-hosted and Automic SaaS are the same product, so the choice is where it runs, not what you get. On Automic SaaS, Broadcom handles platform upgrades and upkeep with U.S. hosting and 99.95% uptime. Either way, your agents stay in your data center or cloud.

Fewer jobs to maintain

Automic's object variables let one job definition serve many flows, so teams can maintain fewer jobs. How much your job count drops depends on your shop and what your Tidal jobs do, and we work that out with you.

Tidal and Automic, side by side

Automation Analytics & Intelligence (AAI) works with both Tidal and Automic, though not necessarily in the same dashboard, so you get SLA management during the conversion and after it. You see deadline misses coming and can act before a job passes its due-out time.

BROADCOM PARTNER AWARDS 2025

Above and Beyond, Global
